SpectrumSCM™

Everyone is SMILING

One Solution for all Source Configuration Management Needs

You only pay once

With SpectrumSCM® you pay only once and reap the benefits forever. No separate license fee for running on different platforms. No need to hire separate CM administrators. No need to procure separate databases. No need to hire separate database administrators. No need to purchase separate licenses for each machine or each OS.

The only tool that provides full CM functionality with one single system

Version Control • Issue Tracking • Workflow • Process Control and Management • Release Management and more.

Everyone Needs it

If you are a software company, engineering firm, IT or non-IT department, call center, help desk, desktop publisher, public relations or ad agency, sales, marketing or anyone who needs to bring structure and efficiency to your product life-cycle contact us.

The only tool that seamlessly integrates all of these with one single system

Manage distributed development teams across multiple geographic locations•Create any previous release of your 'eAssets' at any time•Easily relate actual source changes to a living, track-able problem statement•Manage changes to 'eAssets' and integrate your defined processes•Track and audit the approvals and the communication exchanges amongst stakeholders and team members•Track and audit the progress of customer complaints.

With SpectrumSCM® you buy once and use anywhere. One common system that supports multiple platforms. Windows®, Mac OS®, Unix, Solaris®, Mainframe, Linux®. Yes, we can all get along.
